

## EXIT REALTY NFI PICKS SETTLEMENTROOM FOR TRANSACTION MANAGEMENT

EXIT Realty NFI has entered into a contract with SettlementRoom to provide web-based transaction management to all of their offices through their company portal. Using the SettlementRoom software, every EXIT agent and broker will now be able to give online transaction status pages to their clients. They will also be able to create and implement action plans, manage tasks, track schedules, deliver documents, and set up email reminders for all of their tasks and appointments.

According to Renae Stewart, Vice President of EXIT Realty, “We had already made the decision that a company-wide transaction management system was no longer optional if we were to give our agents the tools they need to outperform the competition. We evaluated all of the transaction management vendors with a national track record, and we found that SettlementRoom had the best software and the lowest price – so the decision was easy.”

Celeste Starchild, Vice President of SettlementRoom, adds that “We were especially proud of the EXIT deal because of the well known emphasis that they place on agent satisfaction and retention. EXIT understands that SettlementRoom will allow their agents to close more transactions with less effort. As a result, their agents will be more successful, which of course benefits everyone involved.”

## EXIT REALTY GEORGIA SELECTS SETTLEMENTROOM FOR TRANSACTION MANAGEMENT

RISMEDIA, August 8 – EXIT REALTY of Georgia has just selected SettlementRoom to offer transaction management for all of it’s agents through the Company’s web portal.

Web based Showing Feedback is now included at no additional cost in its flagship product line. By adding Showing Feedback to its list of features, SettlementRoom consolidates several important Realtor software tools into a single customizable application. Now Realtors can get-web based status pages for their clients, document management and archiving, action plans and task management, scheduling and calendars, and a host of automatic email reminders and team/office tools all built into a single easy to use interface.

“This feature set was requested again and again by our customers, so we decided to add it to our offering immediately” said Jonathan Cutler, President of Settlement Systems, Inc. “That’s the beauty of web-based business management software – new features can be made available to our clients instantly, without the downloads, fees, or maintenance charges common with boxed software.”

This powerful new module allows agents and their coordinators to automate the process of sending repeated requests for showing feedback, and automatically posts the received feedback to their website for viewing and selective sharing with Sellers.
